Statement Information

kWh: Kilowatt-hour. A measure of electrical energy. One kWh is the equivalent of using 1,000 watts for one hour. For example, if you use a 100 watt light bulb for 720 hours (i.e., for 30 days straight), you used 72 kWh.

Customer Charge: A fixed amount to cover the administrative costs to maintain your account, even if no electricity is used.

Non-Fuel Energy Charge: The non-fuel costs to produce and deliver electricity, environmental compliance programs, and for non-demand customers only, the costs of conservation programs.

Fuel Charge: A direct pass-through of the fuel costs to produce and deliver your electricity.

Demand Charges: The cost to supply the maximum amount of energy used on the account within a 30-minute interval during the billing period. For demand customers, this charge also includes the costs of conservation programs.

Electrical Service Amount: Total of the customer charge, fuel and non-fuel charges, and demand charge, if applicable.

Taxes (Utility/Florida Sales/Discretionary Sales Surtax/Gross Receipts):

Taxes on the sale of electricity levied by and paid to the State of Florida or local governments.

Storm Charge: A bond repayment charge approved in a financing order by the Florida Public Service Commission to help finance hurricane and storm-related expenses. The funds are collected on behalf of a separate legal entity for which FPL serves as the collection agent. The storm charge is adjusted periodically to align with actual bond repayment costs.

Franchise Charge: A fee to local governments that we have an agreement with in order to provide electricity in their area.

FPL Care to Share Energy Fund: Contributions collected by FPL and administered by non-profit agencies to benefit those in need.
