## Useful information

### Definitions

#### Climate Change Levy (CCL)

This is a government energy tax on industrial and commercial consumption. If applicable, the tax is calculated at the CCL rate on the front of this invoice. Please visit [hmrc.gov.uk](http://hmrc.gov.uk) for further information on CCL.

#### The De Minimis rule

If a premises uses an average of less than 33 kWh a day (approx. 1,000 kWh a month), it is deemed as 'Domestic' for that month and attracts the domestic rate for VAT. CCL will not be charged for that period.

### In the event of a power cut

To report a power cut, call the national power emergency service on **105**. This is a 24-hour emergency line.

Alternatively, you can contact your local Distribution Network Operator (DNO) using the details below. The DNO maintains the electricity lines that connect your premises to the electricity network. If you are not sure which DNO to contact, refer to the supply number on your invoice. The first two digits of the second line of numbers indicates the relevant area and DNO for your site. For example, the supply number shown here indicates that the area is East Anglia and the DNO is UK Power Networks.
